# The Boat that revolutionized Naval Warfare

For a long time, submarines were not considered to be of great military value - often by men from the highest naval circles. S.M. U9 should change this narrow-mindedness towards the new weapon abruptly and lastingly!

U-Booten wurde lange Zeit kein großer militärischer Wert beigegeben – und das häufig von Männern aus höchsten Marinekreisen. S.M. U9 sollte diese Borniertheit der neuen Waffe gegenüber schlagartig und nachhaltig ändern!
